Luxurious Hot Tubs Made Affordable.

# Atlantis 400

Once Atlantis is discovered, most stop searching for the ideal spa because the Atlantis is among the hot tub industry's very best values. This mid-size spa for four, offers bathers five unique seating areas: a roomy, elongated lounge with arm rests for comfortable seating, a deep therapy seat with lumbar support and room to stretch your legs, a bi-level bench offers a choice of two seating depths, and a cool-down seat provides relief from the warm water or a place for a young guest. The angled control panel is ergonomically designed so it's easy to view and operate the spa. The Atlantis offers deep, comfortable soaking, while its spacious interior provides enough room for the whole family. This mid-sized spa will just fit through a standard exterior doorway making it an ideal selection for indoor or outdoor installations.

## Included on all Genesis Spas
